Dr Alex Rivera (synthetic)
Southside Oncology, Kogarah NSW 2217

Dear Dr Rivera,

Re: Jordan PLACEHOLDER, DOB 30/08/1979, 3 Sample Lane, Parramatta NSW 2150. Medicare 0000 00000 0 (synthetic)

Thank you for seeing Jordan, a 47-year-old software engineer and lifelong non-smoker, with a 3-month history of dry cough and right-sided chest discomfort. A CT chest on 28 August showed a right lower lobe mass with mediastinal lymphadenopathy and a contralateral lung nodule. I have arranged a PET scan and respiratory referral for EBUS.

Past history: Hypertension (2019). Mild asthma since childhood. Appendicectomy 1995.

Current medications: Perindopril 5 mg daily. Salbutamol 100 mcg inhaler 2 puffs prn.

Allergies: Nil known.

Social: Married, two children. Works full time. Never smoked. Alcohol 4 standard drinks per week.

Many thanks for your assistance.

Dr Sam Example (synthetic)
General Practitioner
